

## **Compton Village Homeowners Association Pool Policy For Closing The Pool Due To Inclement Weather**

High Sierra staff is authorized to close the pool and facility and clear it of all patrons, on a temporary basis, when it determines that inclement weather threatens the health or safety of pool patrons.

High Sierra Staff agrees to reopen the pool within 45 minutes after the last indication of inclement weather, so long as at least 60 minutes of general swimming time is remaining.

If inclement weather continues for two hours during normal hours of operation, High Sierra Staff is permitted to reduce staff to one manager or certified pool operator. Other staff members are permitted to leave the facility and serve the remainder of their work day on an on-call basis. If inclement weather status changes and the pool can safely be opened, on-call staff must be contacted and return to the facility as scheduled.

If the air temperature falls to 69 degrees or below, High Sierra Staff is permitted to temporarily close the facility. If air temperature falls to 60 degrees or below for two hours during normal hours of operation, High Sierra Staff is permitted to close the pool and reduce staff to one manager or certified pool operator. Other staff members are permitted to leave the facility and serve the remainder of their work day on an on-call basis. If inclement weather/temperature status changes and the pool can safely be opened, on-call staff must be contacted and return to the facility as scheduled.

If inclement weather continues until 7:00PM and High Sierra Staff finds that 60 minutes of general swimming time will not be permitted due to inclement weather, the pool may be closed at 7:00PM.

At no time shall the facility completely close before 7:00 PM due to inclement weather or temperature unless the safety of High Sierra Staff is threatened due to weather conditions or an emergency.
